## Description

The source color devices are made with InGaN on SiC Light Emitting Diode.
This device radiates intense ultraviolet (UV) light when operated .Most of the UV light emitted is not visible. Exposure to UV radiation can be harmful to your health. Protect your eyes and skin during operation. Do not look directly at the device during operation. Exposure to UV light, even for a brief period, can damage your eyes. Do not operate the device unless you have had proper safety training and take appropriate precautions.

Do not permit children or untrained personnel to operate the device.

Static electricity and surge damage the LEDS.
It is recommended to use a wrist band or anti-electrostatic glove when handling the LEDs.
All devices, equipment and machinery must be electrically grounded.

## Package Dimensions

[^0]1. All dimensions are in millimeters (inches).
2. Tolerance is $\pm 0.25$ ( $0.01^{\prime \prime}$ ) unless otherwise noted.
3. Lead spacing is measured where the lead emerge from the package.
4. Specifications are subject to change without notice.

Remarks:
If special sorting is required (e.g. binning based on forward voltage, luminous intensity/ luminous flux or wavelength),
the typical accuracy of the sorting process is as follows:

1. Wavelength: $+/-1 \mathrm{~nm}$
2. Luminous Intensity/ Luminous Flux: +/-15\%
3. Forward Voltage: +/-0.1V

Note: Accuracy may depend on the sorting parameters
